## MUSTAFA KARAHAN

*President, Turkey Energy Summit*

We are proud to reach the 10th Energy Summit of Turkey, which has become a family gathering of our energy market for the last decade. The Summit has provided a platform where all expectations and suggestions are expressed and all stakeholders contribute to development of relevant energy market.

The economic and political developments due to changes in the global and regional conjuncture have a direct effect on the global energy markets and our country. Despite a significant development in the last 15 years, local energy markets, also took their share. These developments affected Gasoline, LPG, Electricity and Natural Gas sectors in all respects, and this has posed a significant risk for the sustainability of the sector.

During the two-day summit, where the latest developments and trends locally and globally be discussed. Mainly, financing and re-financing the sector, power and natural gas markets, LNG bunkering, alternative fuel technologies, new market model in renewable energy, fuel and LPG markets, trade wars and the impacts of geopolitical developments on commodity markets, the commercialization of Eastern Mediterranean gas and relevant issues will be discussed by leading senior experts in all aspects and the expectations of the sector will be shared with the decision makers.

Once again, I would like to express my gratitude to the Ministry of Energy and Natural Resources, Energy Market Regulatory Authority and all the individuals and organizations which have contributed to the 10th Energy Summit of Turkey. I hope the summit will be beneficial to all.
